

MICRO PRECISION LINEAR ACTUATORS

Modular Miniature Linear Actuators

Helix Linear Technologies, Inc., Beachwood, Ohio

COMPANY

Helix is a global supplier to the Medical Device, Life Science, Security, Semiconductor, Aerospace, Electromechanical and Defense industry. Helix leads the linear motion industry by manufacturing the highest quality linear actuation solutions in the world. We focus entirely on manufacturing electromechanical actuation systems that help our customers be more productive and profitable. Our execution of innovative product designs solves real problems for our customers and builds a foundation for long term success.

HISTORY

Helix was founded in 2011 to manufacture high-quality lead screws for the growing electromechanical actuation industry. Helix's rapid growth has included the addition of linear actuator solutions to deliver integrated and or turnkey solutions.

CULTURE

Our culture is based on a team of smart, happy and competitive professionals focused on manufacturing innovative products centered on delivering precise electromechanical linear motion solutions. We are in the people business, as well as the product business. People make and sell our products and a team of smart, happy and competitive people focus on success.

OPERATIONS

Our company is built to deliver high-quality products and engineering support to solve the most demanding linear motion applications in any industry. We deliver components and subsystem solutions to high volume OEMs and custom machine builders to help secure their success.

IPA - Integrated Motor Linear Actuator

- Hybrid stepper motor
- Integrated profile rail
- PTFE coated screw
- Anti-backlash nut

Helix attaches the lead screw to a custom designed hybrid stepper motor with beefed-up deep groove ball bearings to maximize thrust loads and rigidity.

Motors are laser welded to the lead screw for a truly compact low cost actuator. They are available with optional encoders, connectors, and custom cables.

CPA - Coupled Motor Linear Actuator

- Hybrid stepper motors and stepper servo motors
- Integrated profile rail
- PTFE coated screw

Standard motor mounts allow for attachment of any NEMA frame motor. The lead screw is supported by deep groove ball bearings for years of dependable life and rigidity.

Motor mounts come complete with coupling. Custom mounts can be supplied.

SPA - Simple Linear Actuator

- Hand, motor or belt actuated
- Integrated profile rail
- PTFE coated screw

These actuators come standard with a journal end on the lead screw, making it convenient to supply your own drive; belt, coupler or knob. There is versatile manual brake option for securely locking the actuator into position.

The lead screw is supported by end mounted deep groove ball bearings for years of dependable life and rigidity.

PROFILE RAIL SPECIFICATIONS

High Load and High Moment Capacity

The HMR Miniature Linear Guide series is designed using two rows of recirculating balls. The design uses a Gothic profile with a 45° contact angle to achieve equal load capacity in all directions. Within the restriction of limited space, larger stainless steel balls are used to enhance the load and torsion resistance capacity.

Helix linear guides (indicated with the thick black line to the right) provide greater surface contact as compared to competing products (indicated with the thin green-dotted line at right) when comparing same widths rails.

Lubrication Storage Design

Lubricant injection holes are featured at both ends of the runner block. As the balls circulate during movement of the block, the stainless steel balls carry lubrication oil to the raceway, thus efficiently lubricating the balls and the oil raceway, and achieving long-term, maintenance-free linear motion. This design also provides superb lubricating ability for short stroke movement. A newly-invented embedded lubrication pad design provides a selection of options for machine design.

(3M /W, 5M /W, 7M /W, 9M /W, 12M /W, 15M /W)

HMR-ee Series Stainless Steel Reinforced Plates Ensure High Robustness

Runner blocks are equipped with two stainless steel plates which reinforce the end-cap from end to end. This sturdier design supports higher running speeds. The plates can also function as scrapers to facilitate smooth travel.

Linear Guidance Options and Specifications

Built with Anodized aluminum and noncorrosive components for years of dependable life - ideal for clean environments. Motors are laser welded to the 300 series stainless screw for additional stiffness and loading. These linear actuators are available with optional encoders, connectors, sensors and custom cables. Standard accessories such as mounting blocks, limit switches and high-payload options are also available.

In addition, Helix offers three rail options including no rail, single rail and double rail with the following characteristics:

No Rail

Single Rail

Dual Rail

No Rail

Non-motorized. Economical alternative rail. Used for low load, speed. Load can ONLY come from X axis.

Single Rail

NEMA 14, 17 and 23 stepper motor compatible. Higher load and speed. Load can come from X, Y and Z axis.

Double Rail

NEMA 14, 17 and 23 stepper motor compatible. Highest load and speed. Load can come from X, Y and Z axis.

CARRIAGE LOADS

	X	Y	Z	Normal Load
No Rail	Mx = 20 lb/in	Mx = 20 lb/in	Mx = 20 lb/in	Mx = 50 lb/in
Single Rail	Mx = 145 lb/in	Mz = 110 lb/in	Mz = 110 lb/in	Mx = 150 lb/in
Double Rail	Mx = 200 lb/in	My = 300 lb/in	Mz = 200 lb/in	Mx = 300 lb/in

OPTICAL ROTARY ENCODERS

- Designed to provide digital feedback information
- Molded polycarbonate enclosure
- 5-pin or 10-pin finger latching connector (sold separately)
- 32 to 5000 cycles per revolution (CPR)
- 128 to 20000 pulses per revolution (PPR)
- 2 channel quadrature TTL squarewave outputs
- Optional index (3rd channel)
- -25 to +100C operating temperature
- Mounting compatibility with HEDS-5500

For differential versions: the internal differential line driver (26C31) can source and sink 20mA at TTL levels. The recommended receiver is industry standard 26C32. Maximum noise immunity is achieved when the differential receiver is terminated with a 150 resistor in series with a .0047 F capacitor placed across each differential pair. The capacitor simply conserves power; otherwise power consumption would increase by approximately 20mA per pair, or 60mA for 3 pairs. The mating connectors are available from US Digital with several cable options and lengths.

MAGNETIC SENSORS

- Non-contact sensors determine position of carriage
- Maintains integrity of linear actuator
- Sensors operate without intruding upon the actuator, keeping the system completely intact

Operating Voltage	5-28 VDC
Voltage Drop	1.0 V
Current Rating	0.2 Amps Max.
Switching Power	4.8 watts Max.
Switching Speed	4µs operate / 4µs release
Short Circuit Protection	No

Operating Temperature	-4°F to 176°F (-20°C to 80°C)
Protection Rating	NEMA 6 / IP 67
Agency Approvals	CE, RoHS, REACH

LINEAR MOTION APPLICATIONS

High Quality, Precision Linear Motion Solutions

LIFE SCIENCES

- Pipeting automation
- Syringe pumps
- Microscopes
- MRI scanners
- CT scanners
- Radiographic machines
- In-vitro diagnostics
- Genomics
- Blood gas chemistry

PRINTING & BINDING

- "Z" axis actuators
- Multi-axis gantries
- 3D printing
- Automation / Material handling
- Additive manufacturing (AD)
- Large format sign printing
- Digital offset printing process
- Folding and sealing equipment
- Thermal CTP systems

SECURITY - MILITARY

- Automated door locking systems
- Pan-tilt-zoom cameras
- Automated gates
- Tactical automated security cameras
- Missile fin actuation
- Tank sighting systems
- Drones and UAVs
- Torpedo fin actuation
- Guided munitions

SEMICONDUCTOR

- Burnishing stages
- Stacking systems
- Vision inspection machines
- X, Y, Z gantries
- Wafer elevators / Wafer handling
- Acoustic microscopes
- Ultrasonic imaging
- Tuning coils
- Vacuum chamber doors
